

**Sno-Isle Libraries**

**2025 SIL Wireless Access Points & Licensing RFP**

**470# 250011832**

**RFP Updates and Q&A**

**01/22/2025**

**Q:** Will Sno-Isle Libraries consider non-Meraki WAP solutions? If so, please provide a brief description of the interconnection requirements between wireless and wired networks (VLANs, SSIDs, etc) and network requirements between branch offices (VLANs, QinQ, etc).

**A:** This inquiry arrived after the deadline for questions, which was January 14, 2025, and we cannot provide a detailed response. The RFP requests bids for the products and licenses (or ones with equivalent capabilities) that the Library plans to purchase and it provides sufficient information for a vendor to submit a qualified bid. In accordance with E-Rate rules and as stated in the RFP, the Library will evaluate all proposals for products with the equivalent functionality, regardless of the manufacturer.
